PROFESSIONAL SUMMARY

Software Developer and Informatics Engineering student with hands-on experience in building scalable web and desktop applications. Specialized in full-stack development and Artificial Intelligence, specifically Computer Vision. Proven ability to handle complex R&D projects, including real-time object detection and person re-identification systems. Passionate about creating user-centric solutions and continuously mastering modern technologies like React, Laravel, and Python.

TECHNICAL SKILLS

Programming Language

- JavaScript
- TypeScript
- PHP
- Python

Web Frameworks

- React.js
- Laravel
- Express.js
- Django

Desktop

- Electron.js
- PySide6

Databases

- MySQL
- MongoDB

- SQLite

Tools

- Git
- Figma
- Canva
- MS Office

WORK & INTERNSHIP EXPERIENCE

PT Imersa Solusi Teknologi | Internship (Field Work Practice) May 2025 – June 2025

- Collaborated in an agile software development team to build and maintain web-based applications.
- Gained hands-on experience in production-level codebases, debugging, and feature implementation.

Halofina | MSIB (Certified Independent Study & Internship) September 2024 – December 2024

- Served as a Platform and Web Developer for financial and banking services.
- Contributed to the development of secure and responsive web modules for financial tracking.

Kediri Esports Nusantara (KEN) | Media Creator 2022 – 2024

- Managed content creation and social media channels, increasing audience engagement through photography and videography.
- Collaborated with the branding team to produce consistent visual materials.

FEATURED PROJECTS

Person Re-Identification System (Computer Vision Research) | Oct 2025 – Present

- Engineered a deep learning system using ResNet50-IBN-A architecture to identify individuals across non-overlapping camera views.
- Developed a robust feature extraction pipeline to handle variations in lighting and subject appearance.

- Evaluated model performance using mAP and Precision/Recall metrics to ensure industrial-grade reliability.

Ruanghuni – Premium Accommodation Platform | March 2025

- Designed and developed a responsive premium website for luxury guesthouses featuring glassmorphism UI.
- Integrated a direct WhatsApp booking system and interactive gallery to enhance user conversion rates.
- Optimized web performance and SEO, resulting in high accessibility across different browsers.

POSinAja – Desktop Point of Sale Application | July 2025

- Built a cross-platform desktop POS system using Electron.js, React, and Express.js.
- Implemented a local-first data architecture using SQLite for offline-capable inventory and sales management.
- Designed an intuitive interface to streamline daily transactions and financial reporting for SMEs.

EDUCATION

Universitas Nusantara PGRI Kediri | 2022 – 2026 (Expected)

- Relevant Coursework: Software Engineering, Artificial Intelligence, Database Management.

Madrasah Aliyah Syiar Islam Maibit | 2019 – 2022

- Social Sciences (IPS)

CERTIFICATIONS & AWARDS

- MSIB Certified Independent Study & Internship | Halofina - Platform and Web Developer for Financial/Banking Service (Dec 2024)
- Software Development Internship Certificate | PT Imersa Solusi Teknologi - Field Work Practice (June 2025)
- Responsive Web Design | freeCodeCamp Developer Certification (Jan 2023)
- Workshop: Automation Bots (Batch 1) | STAIN - Seminar Nasional Teknologi & Sains II, UNP Kediri (Jan 2023)

- Seminar: National Seminar on Technology & Science II (STAINS) | Theme: Artificial Intelligence in Driving the Creative Economy (Jan 2023)
- Workshop: Python (OOP Implementation) | Universitas Nusantara PGRI Kediri (June – July 2023)
